

Project Euler #6: Sum square difference

Problem Statement

This problem is a programming version of [Problem 6](#) from [projecteuler.net](#)

The sum of the squares of the first ten natural numbers is, $1^2 + 2^2 + \dots + 10^2 = 385$. The square of the sum of the first ten natural numbers is, $(1 + 2 + \dots + 10)^2 = 55^2 = 3025$. Hence the difference between the sum of the squares of the first ten natural numbers and the square of the sum is $3025 - 385 = 2640$.

Find the difference between the sum of the squares of the first N natural numbers and the square of the sum.

Input Format

First line contains T that denotes the number of test cases. This is followed by T lines, each containing an integer, N .

Output Format

Print the required answer for each test case.

Constraints

$$1 \leq T \leq 10^4$$

$$1 \leq N \leq 10^4$$

Sample Input

```
2
3
10
```

Sample Output

```
22
2640
```
